GPEDIT.MSC

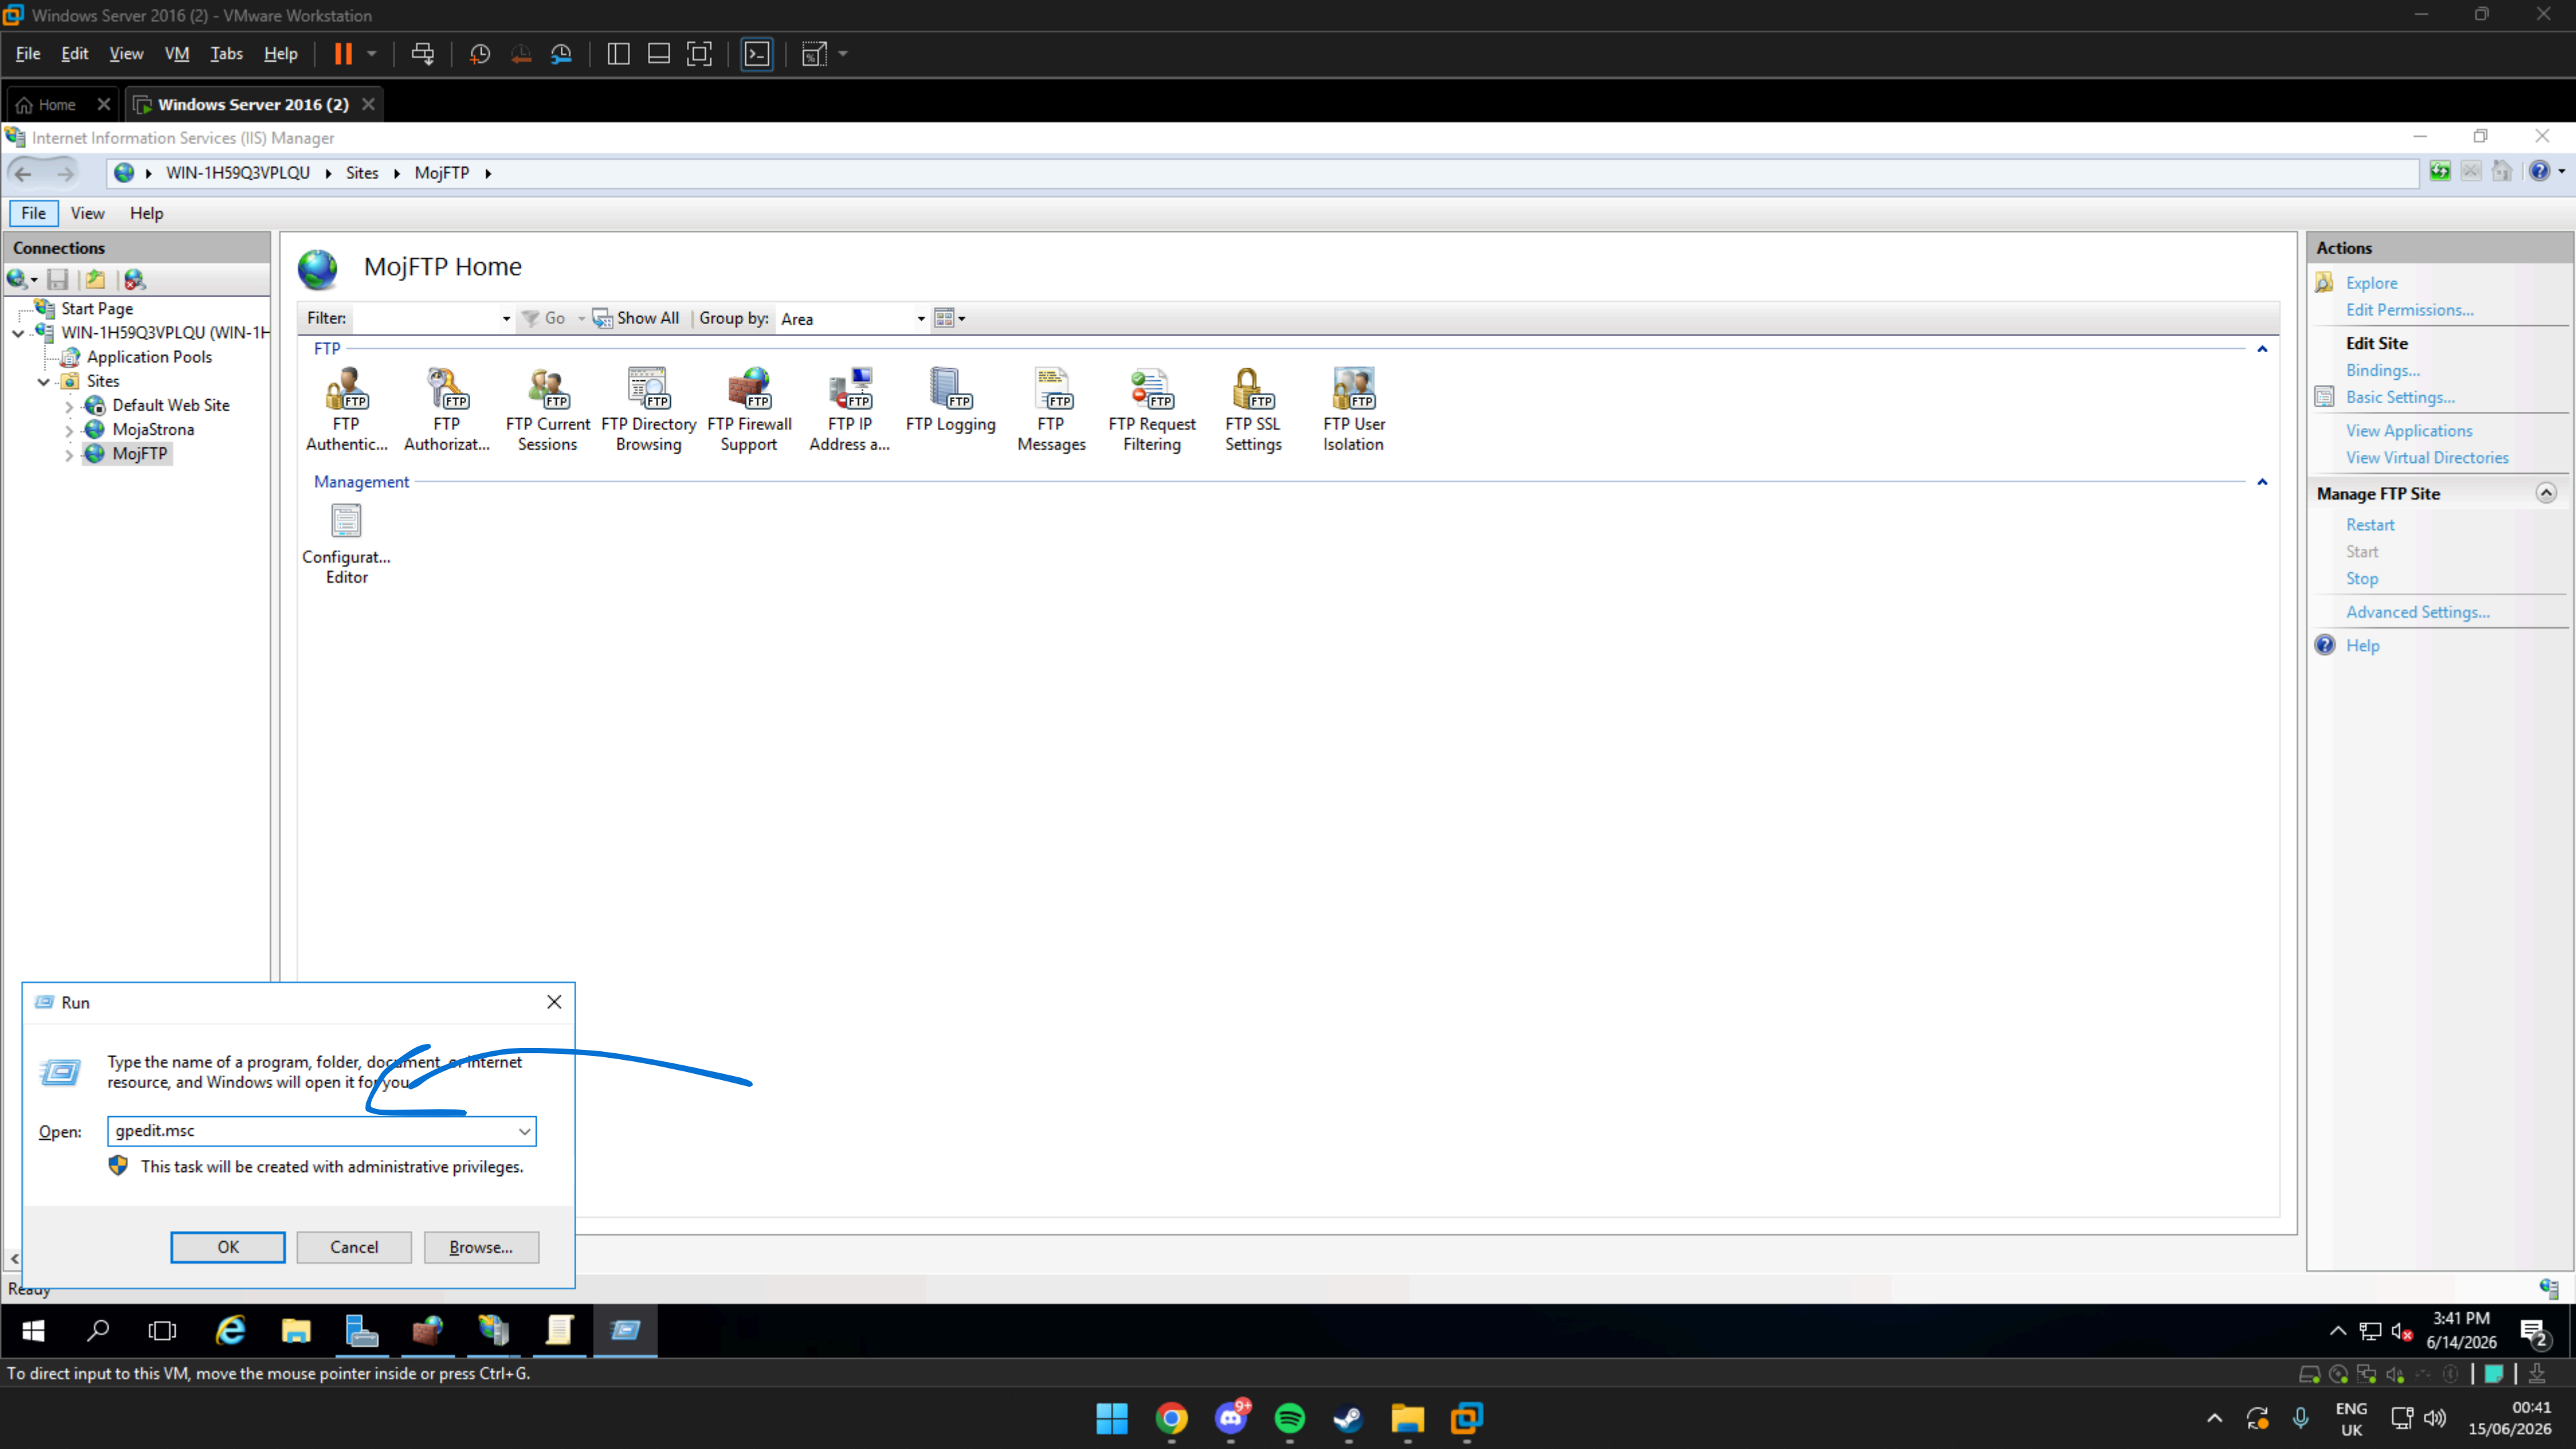

Lokalne zasady grup (Group Policy) to centrum dowodzenia ograniczeniami w systemie Windows. Za jego pomocą administrator może jednym kliknięciem zablokować wybrane funkcje systemu (np. wyłączyć pendrive'y, ukryć zegarek, zablokować wiersz poleceń) dla wszystkich użytkowników komputera. Narzędzie to uruchamia się wpisując w polecenie Uruchom skrót gpedit.msc.

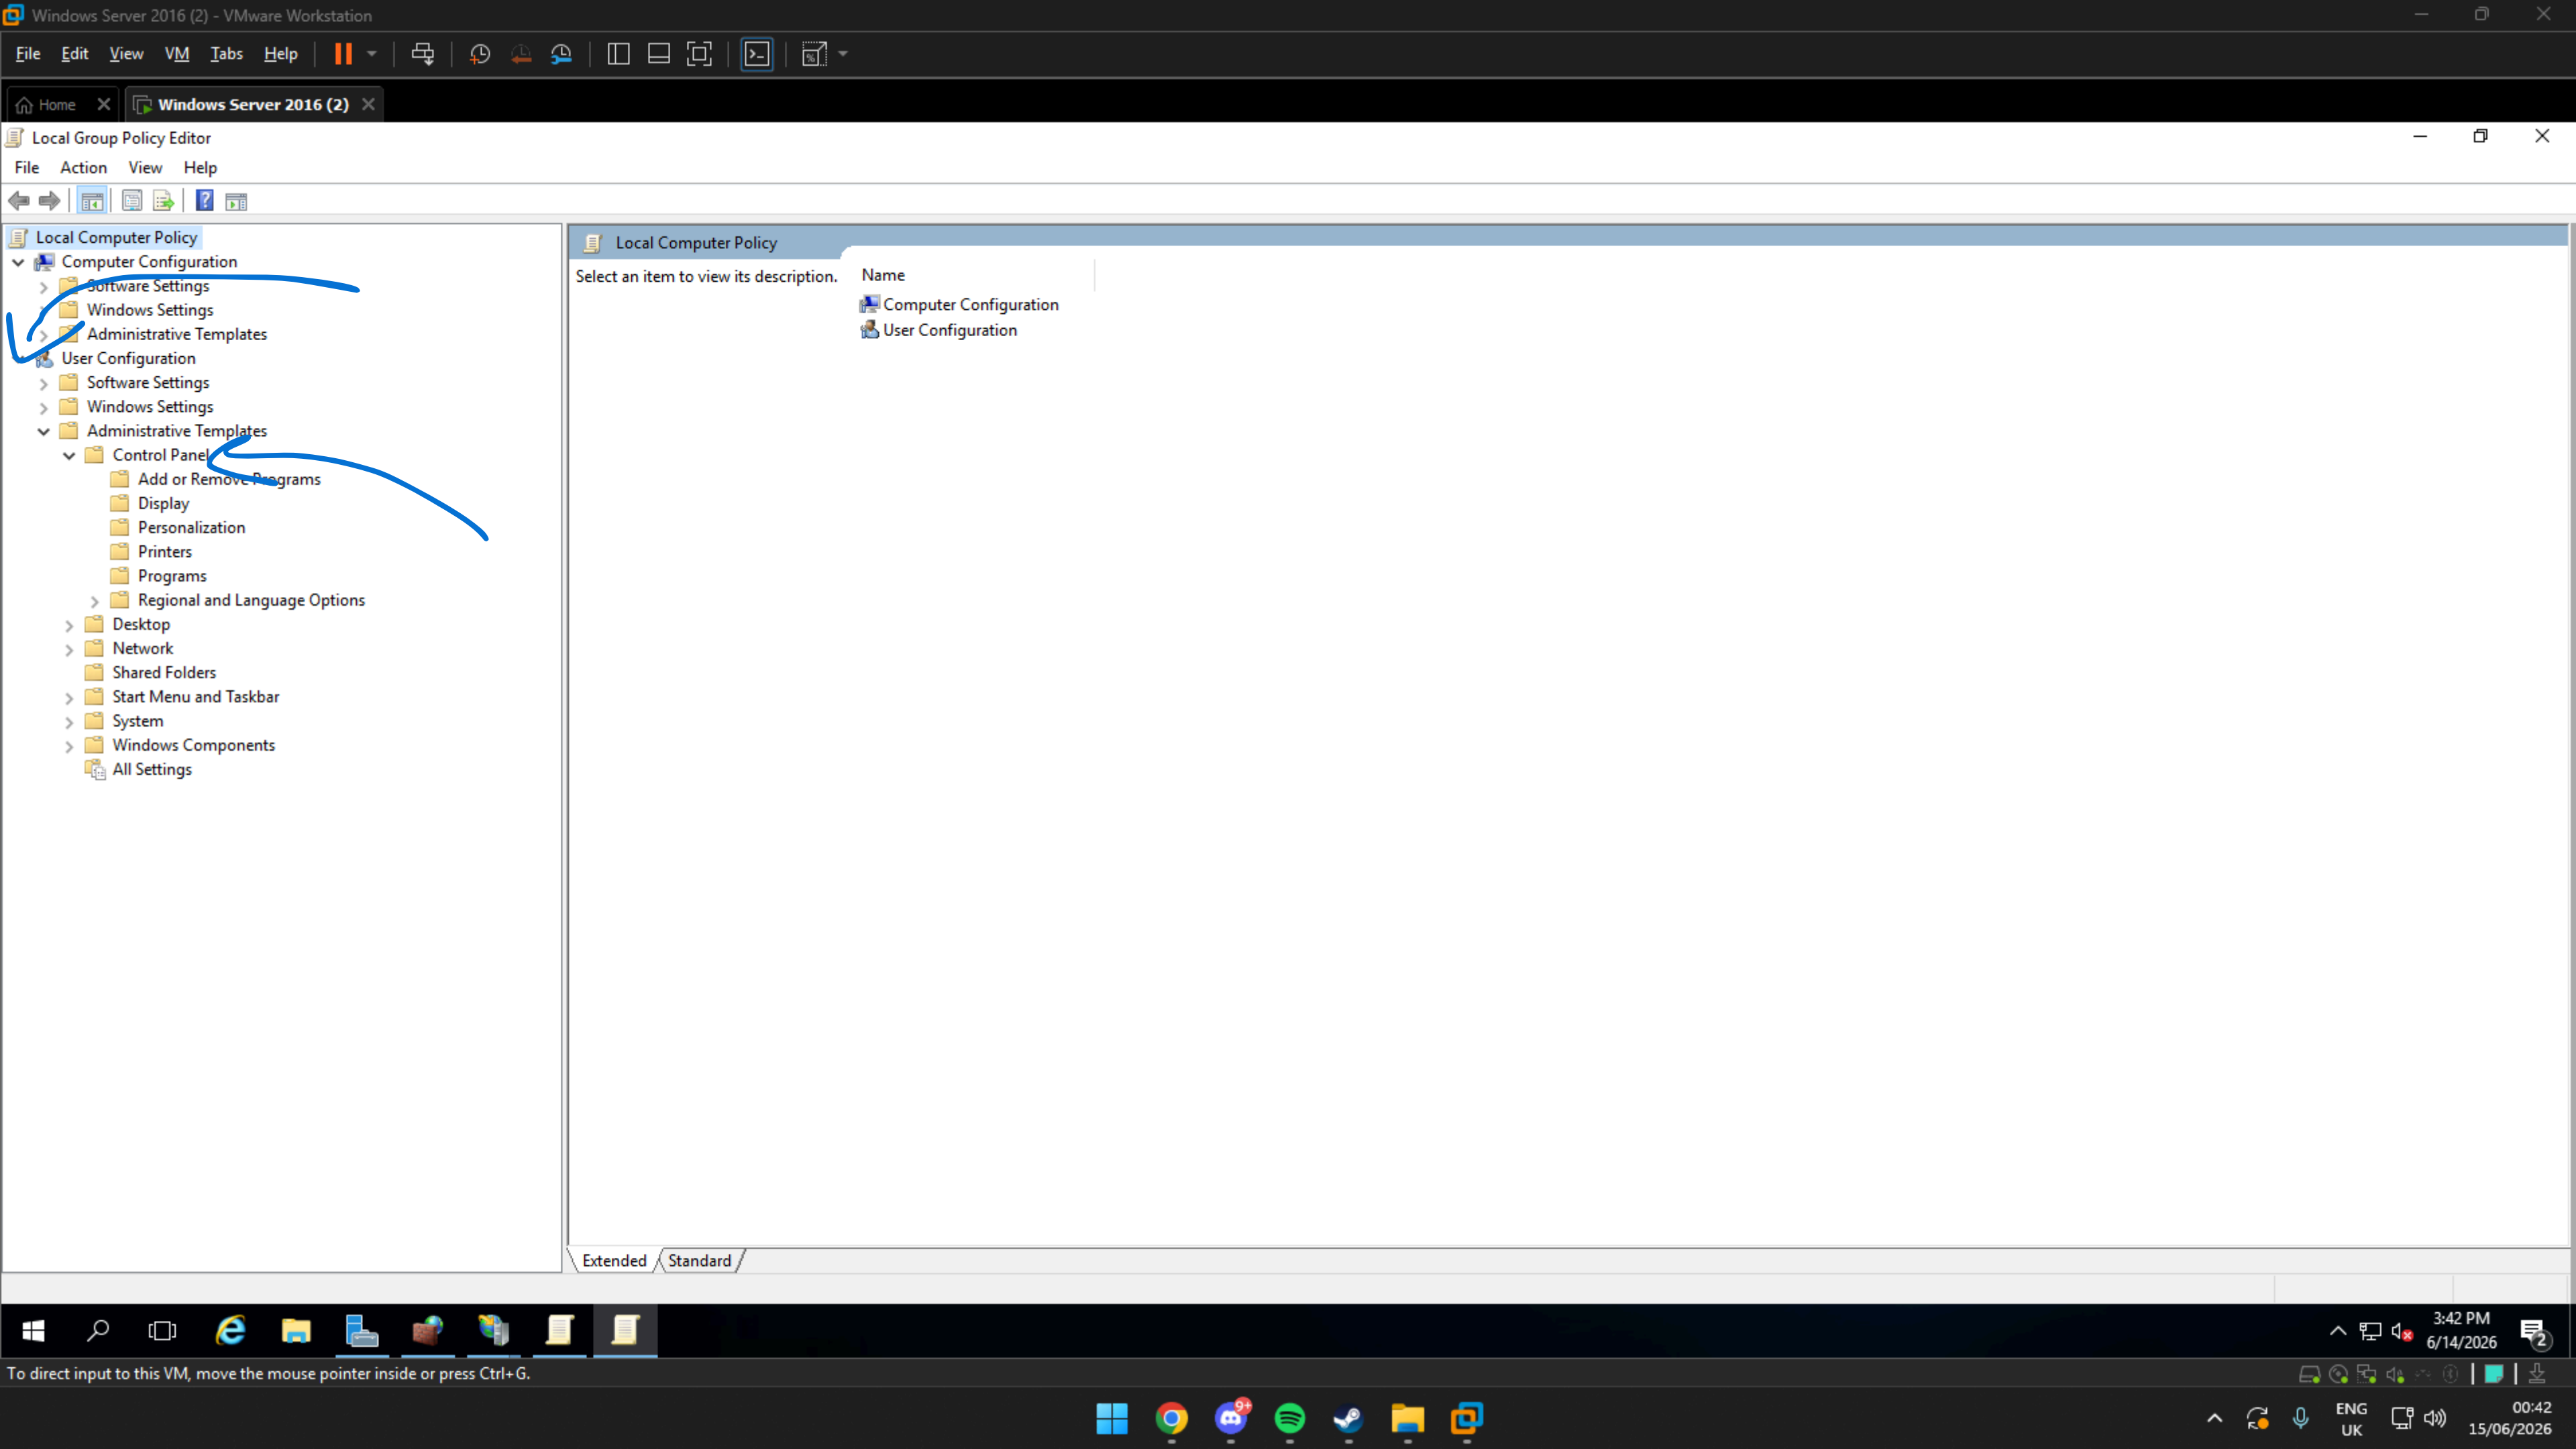

KONFIGURACJA

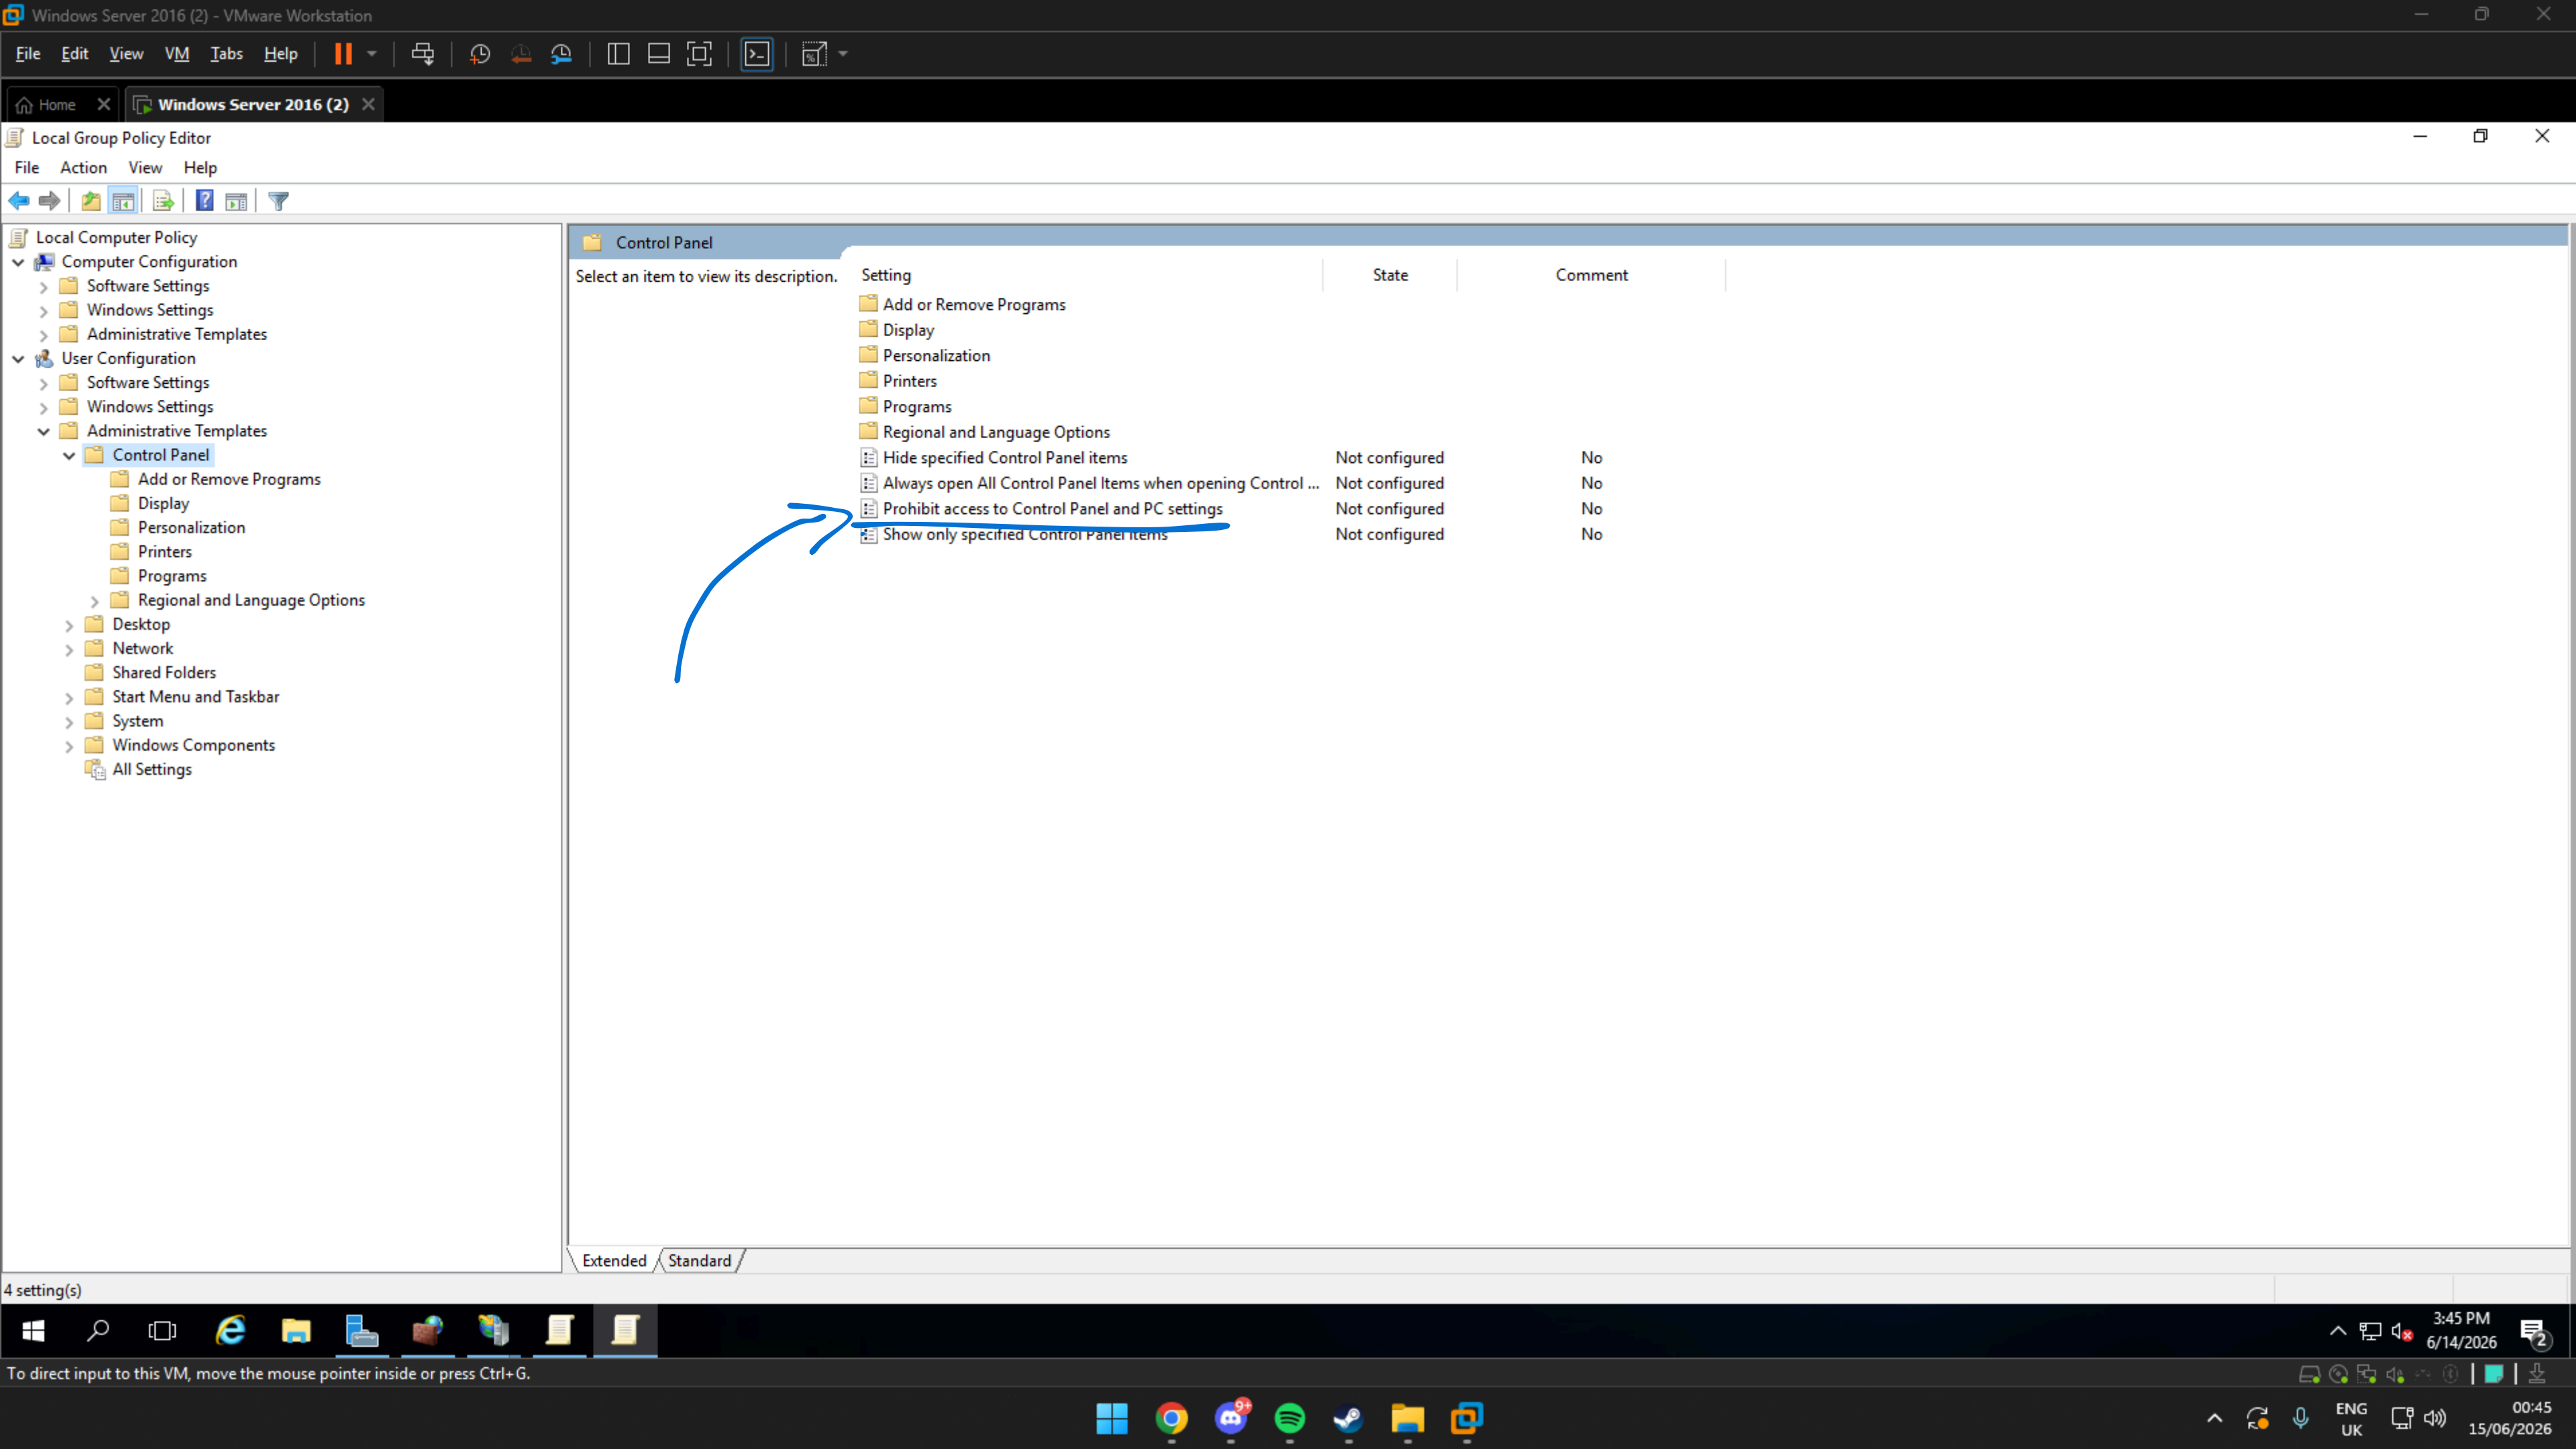

- Gdy otworzysz gpedit.msc, po lewej stronie zobaczysz dwa główne foldery. Musisz je rozróżniać, żeby nie stracić punktów:
- Konfiguracja komputera (Computer Configuration) – ustawienia tutaj dotyczą samego systemu, niezależnie od tego, kto się zaloguje (np. zasady haseł, zaporę sieciową, automatyczne wyłączanie komputera).
- Konfiguracja użytkownika (User Configuration) – ustawienia tutaj dotyczą osoby, która się loguje (np. wygląd pulpitu, blokada Panelu sterowania, ukrywanie dysków w Eksploratorze).

BLOKOWANIE FUNKCJI SYSTEMU

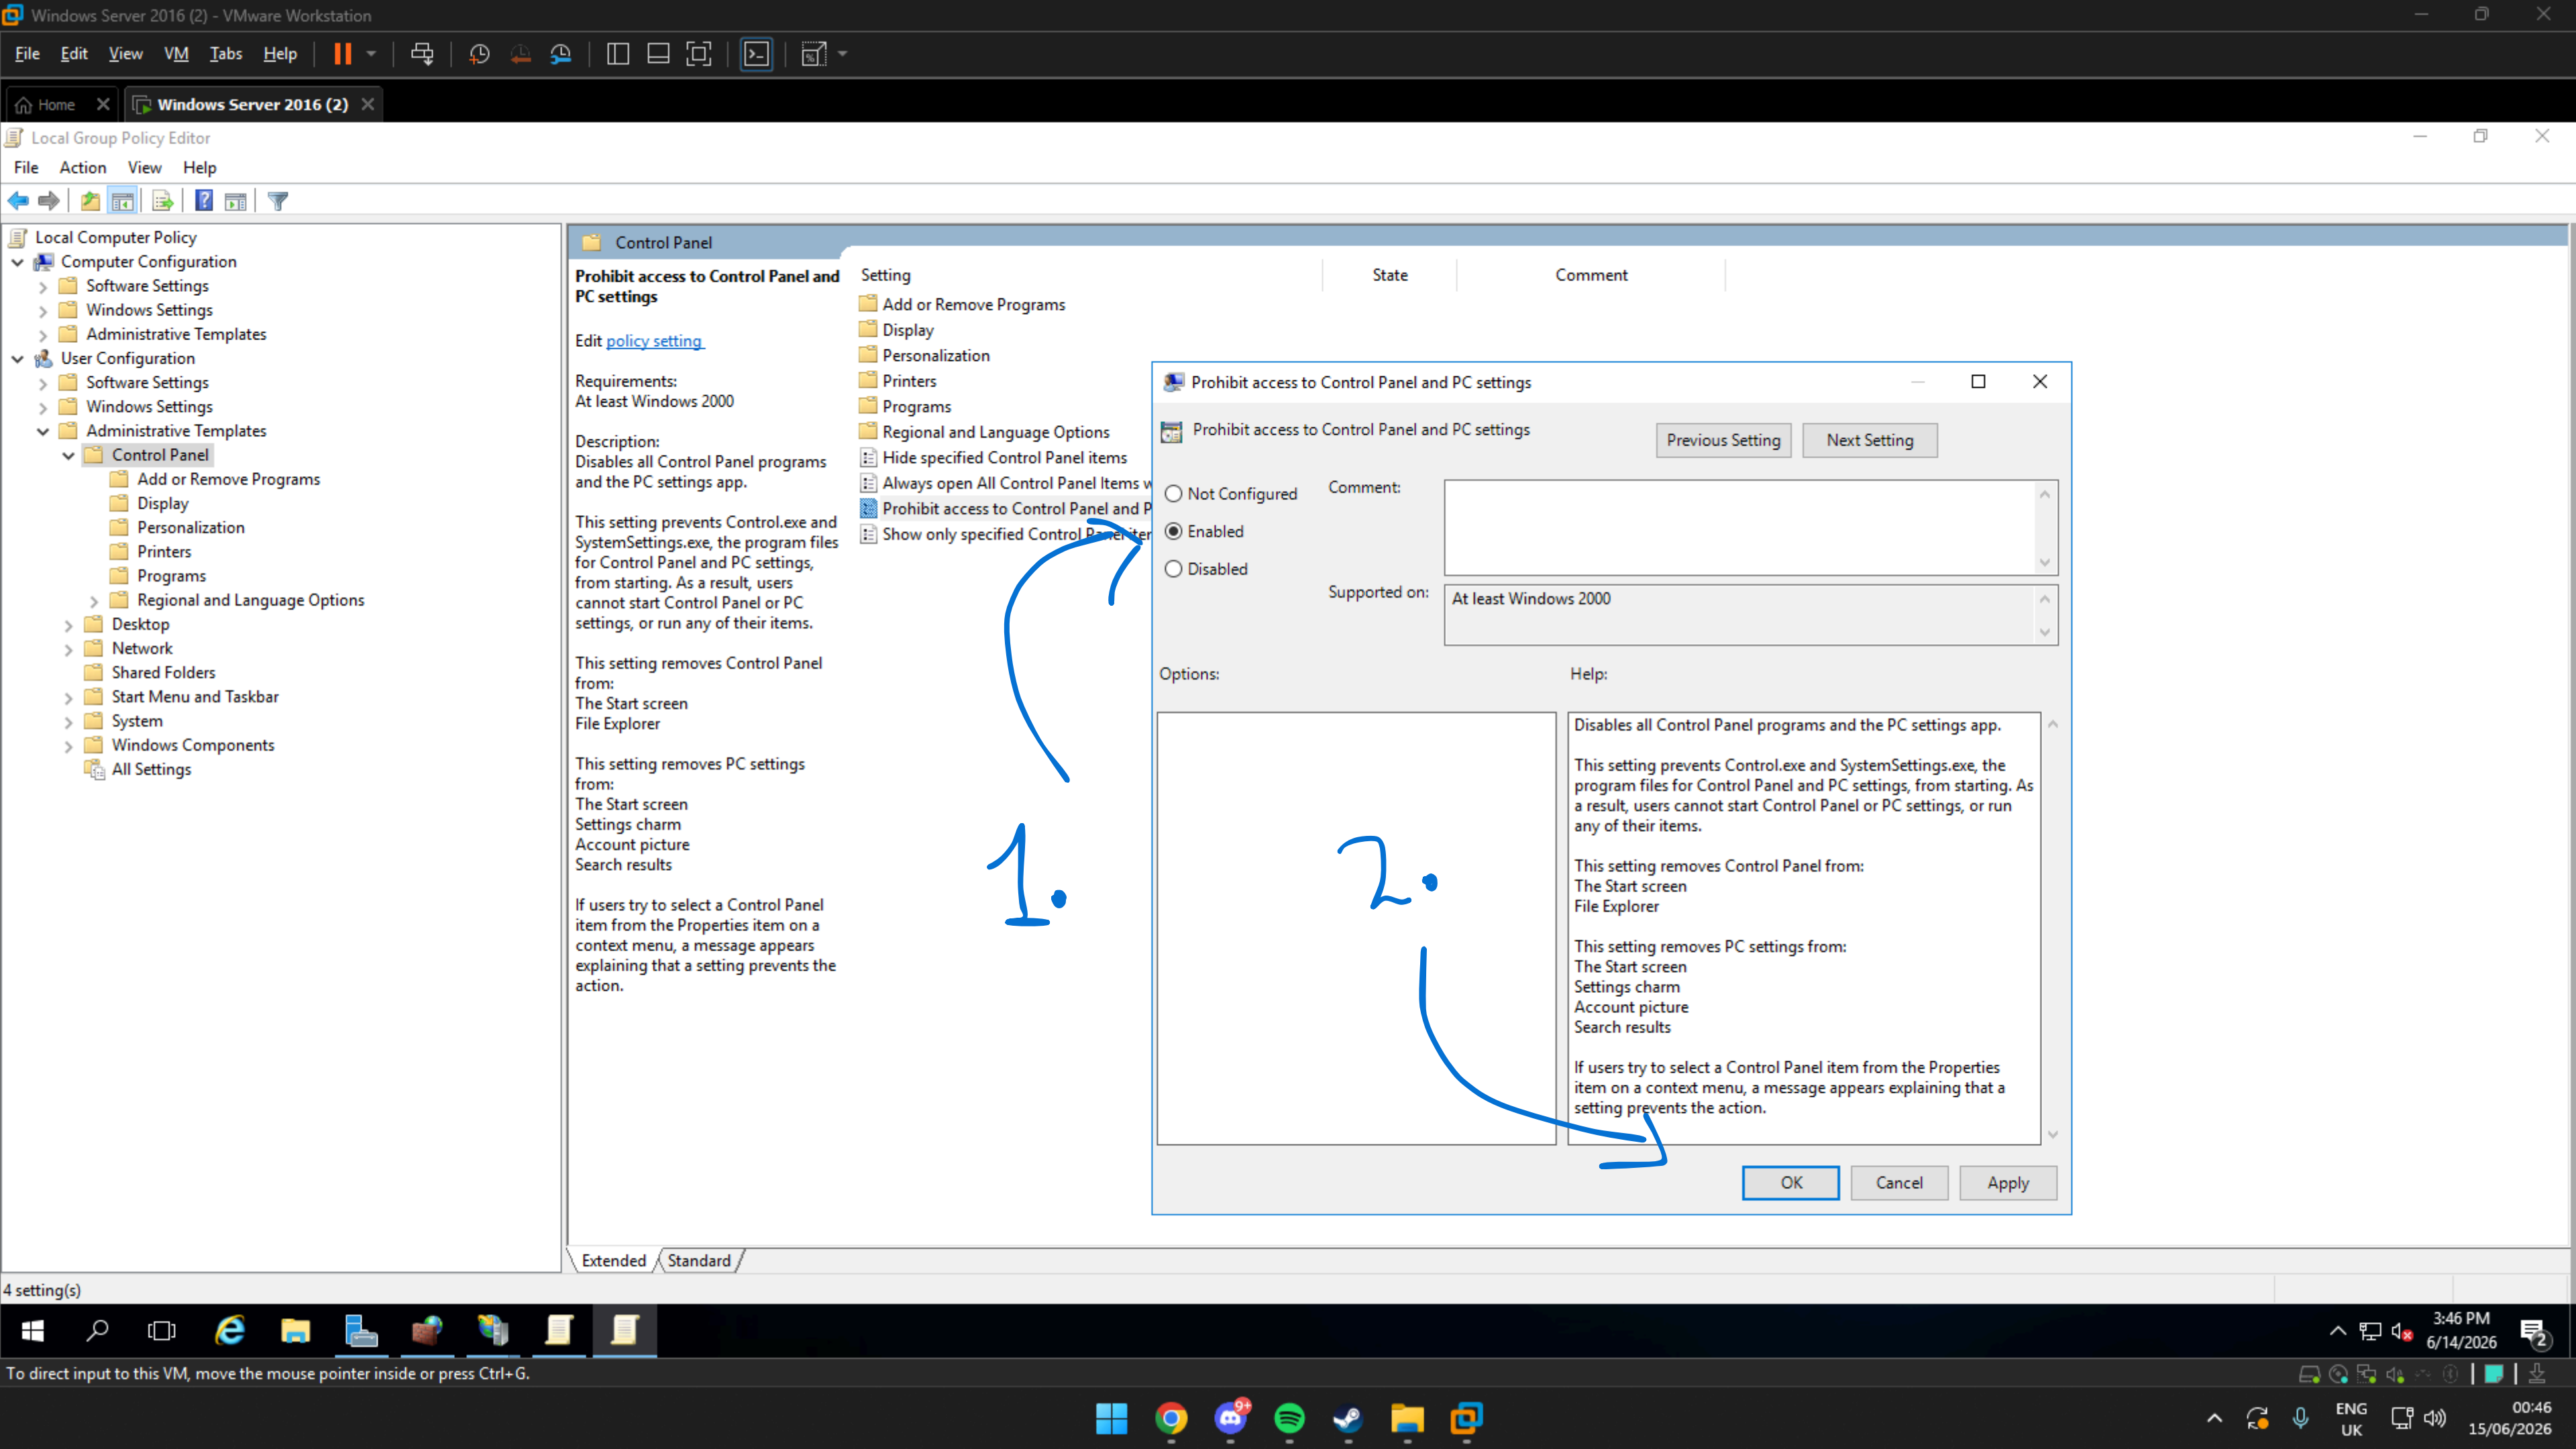

TREŚĆ ZADANIA: ZA POMOCĄ LOKALNYCH ZASAD
GRUP ZABLOKUJ UŻYTKOWNIKOM DOSTĘP DO PANELU
STEROWANIA ORAZ USTAWIEŃ SYSTEMU.

Control Panel

Prohibit access to Control Panel and PC settings

Edit [policy setting](#)

Requirements:
At least Windows 2000

Description:
Disables all Control Panel programs and the PC settings app.

This setting prevents Control.exe and SystemSettings.exe, the program files for Control Panel and PC settings, from starting. As a result, users cannot start Control Panel or PC settings, or run any of their items.

This setting removes Control Panel from:
The Start screen
File Explorer

This setting removes PC settings from:
The Start screen
Settings charm
Account picture
Search results

If users try to select a Control Panel item from the Properties item on a context menu, a message appears explaining that a setting prevents the action.
