

FTP

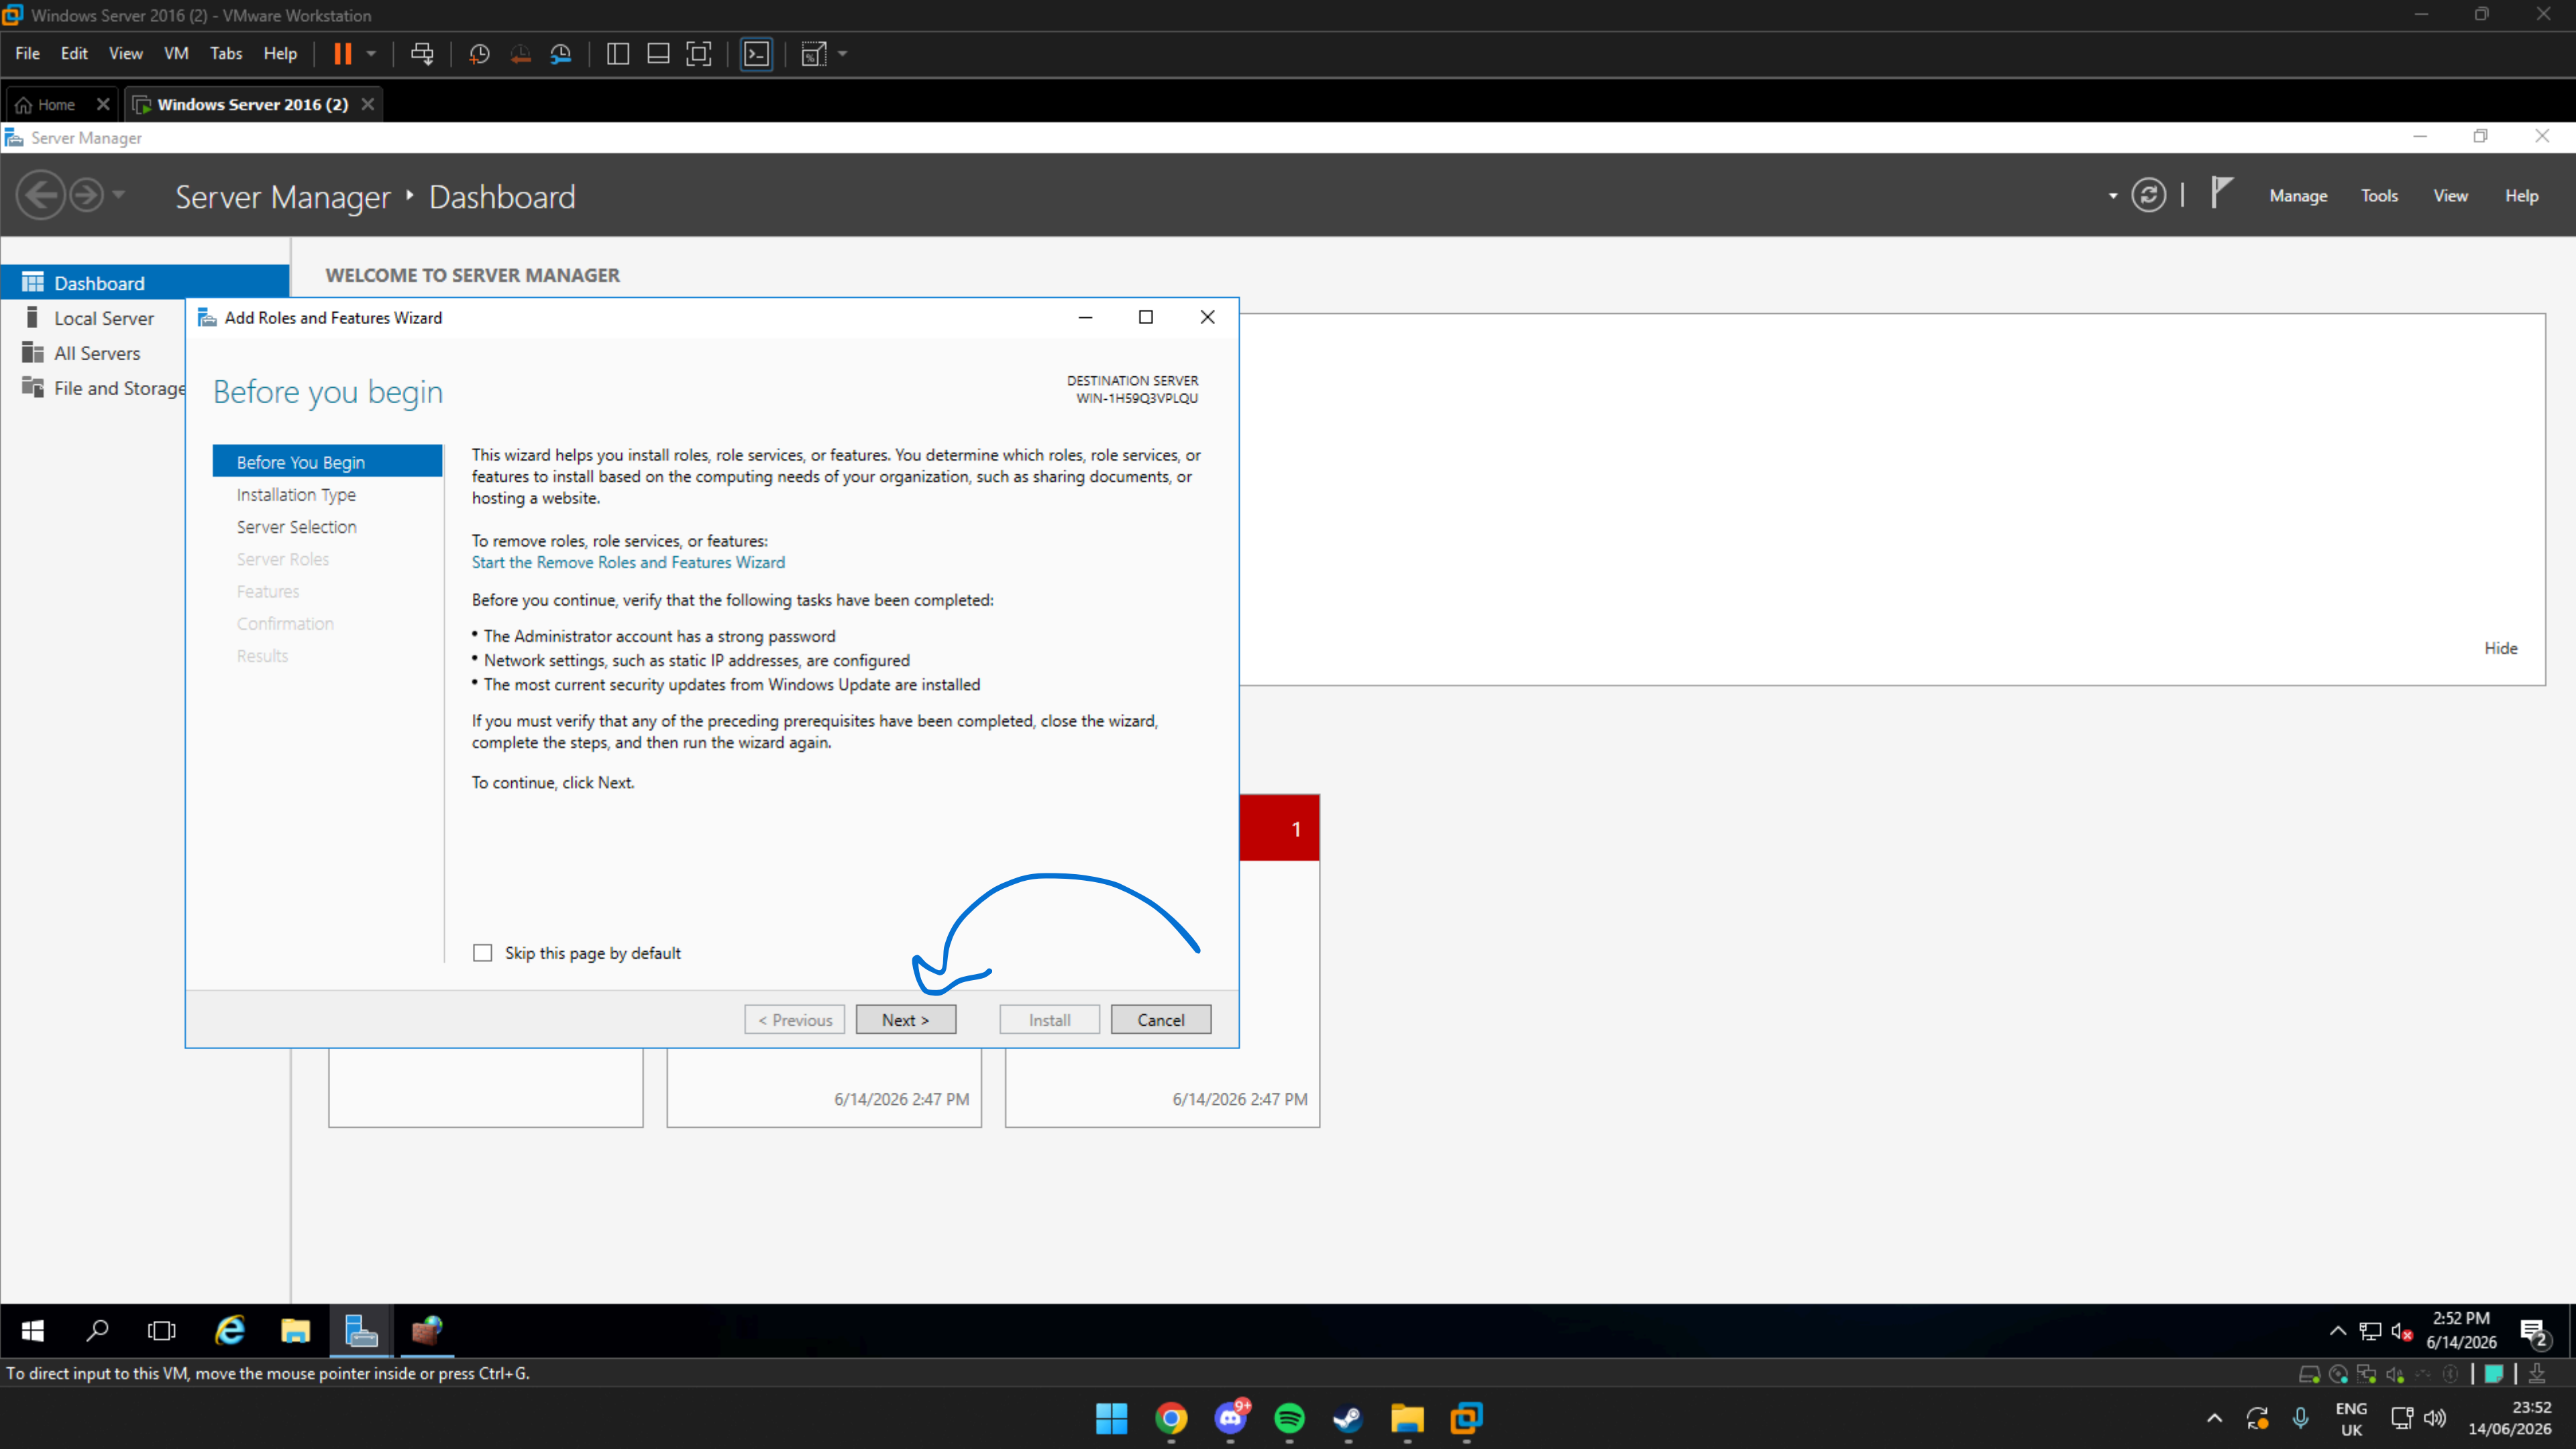

franz-bonaparta.github.io

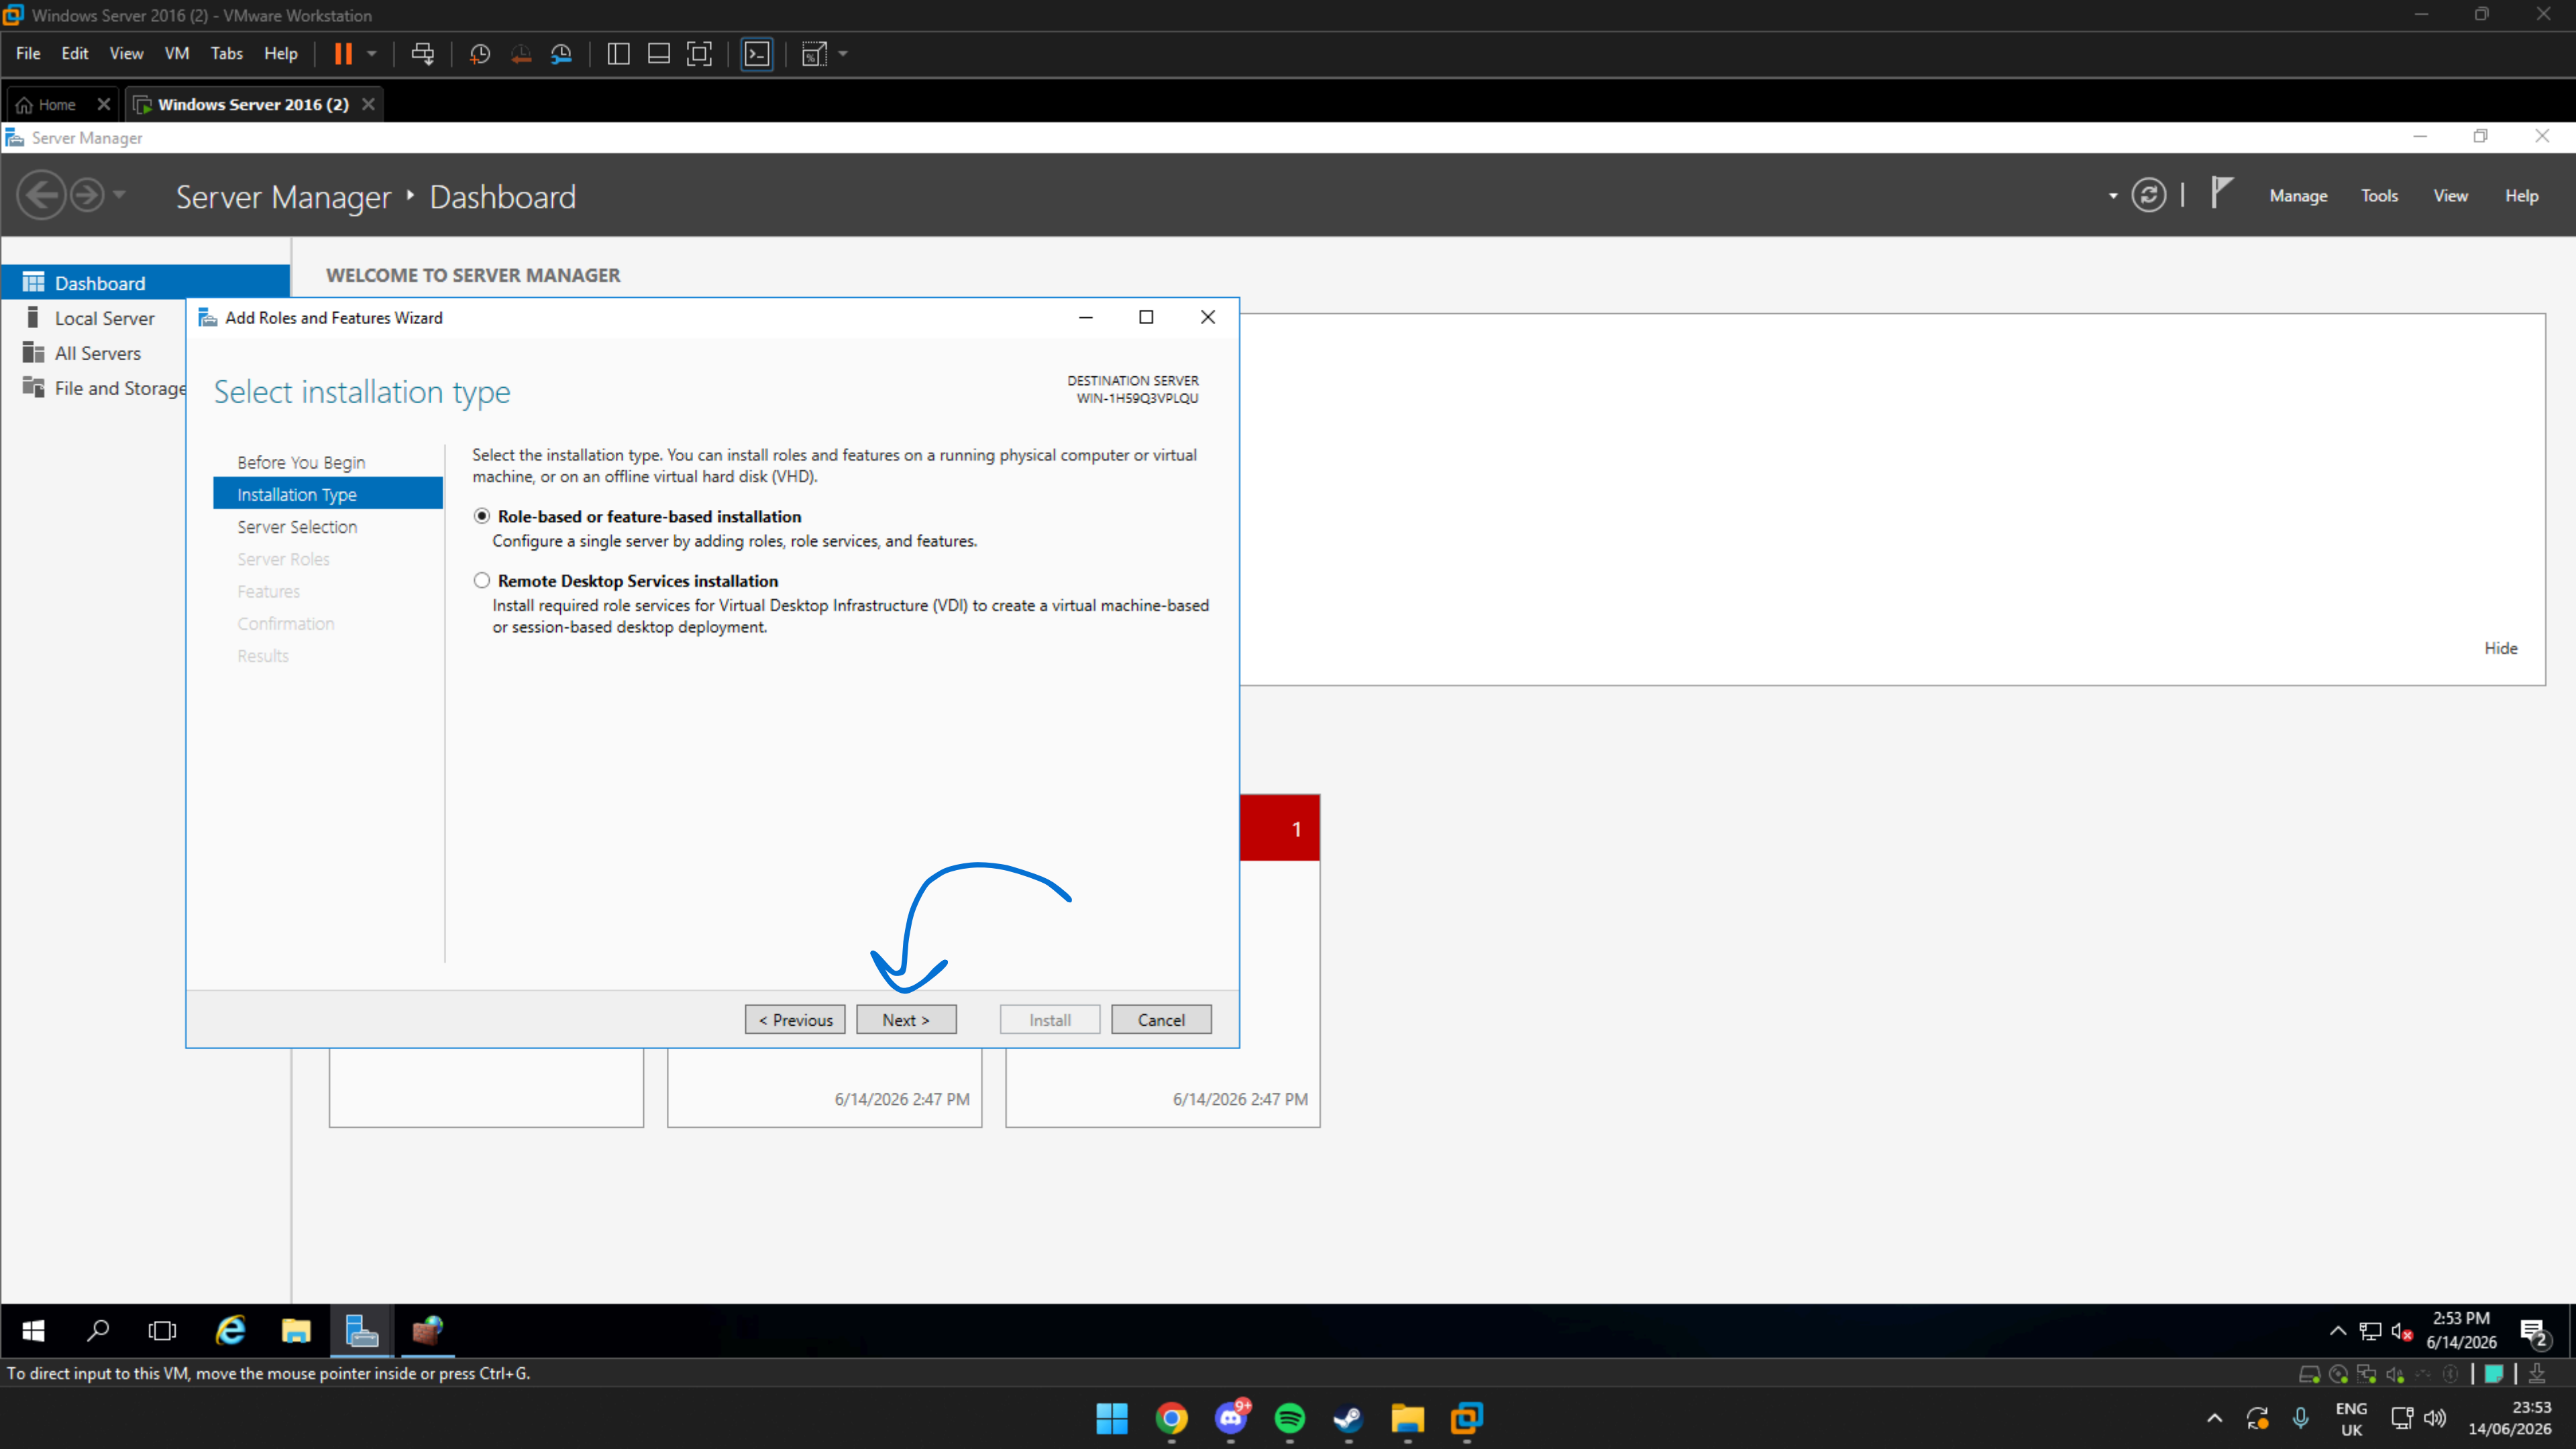

FTP

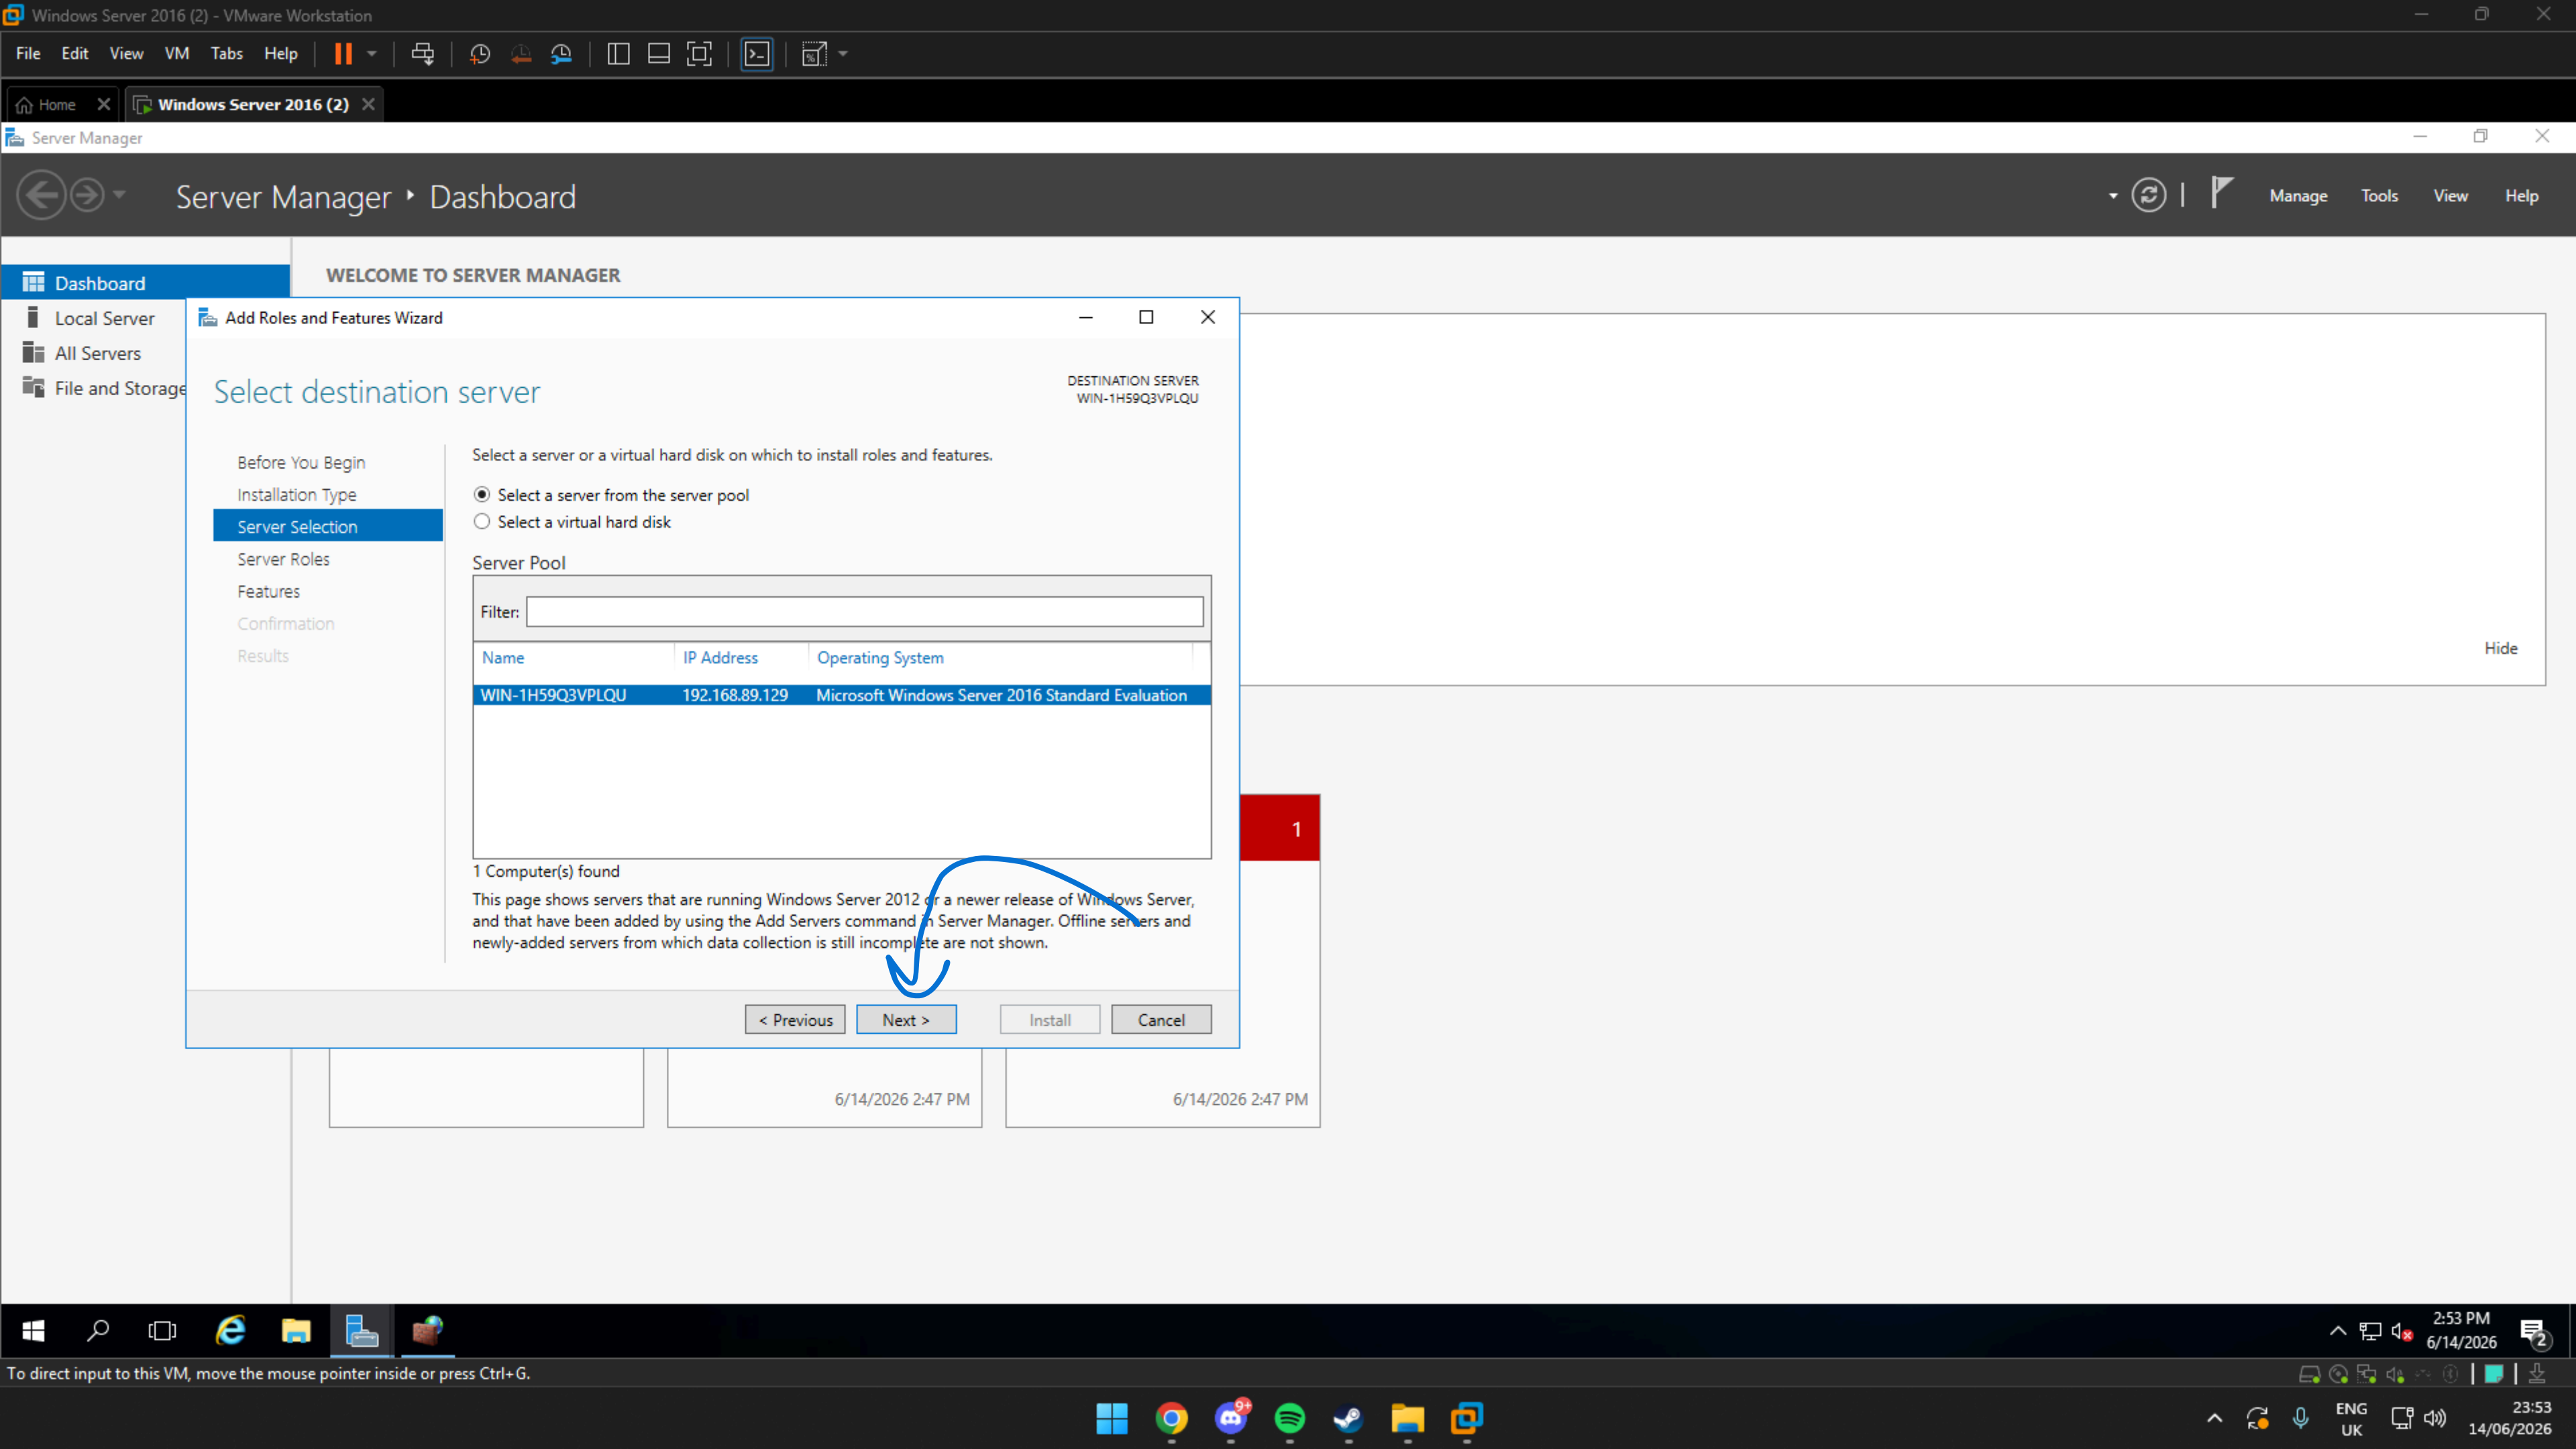

FTP to protokół służący do przesyłania plików między komputerami w sieci. Działa w architekturze klient-serwer: serwer FTP udostępnia określony folder na swoim dysku, a użytkownik (klient) może się do niego zalogować, aby pobierać stamtąd pliki lub wrzucać nowe (np. pliki strony WWW). Usługa ta domyślnie działa na porcie 21.
